

discharging the resin flowing from said central passage and said additional central passage, an air cap mounted over said fluid tip and defining with said fluid tip an air nozzle for flowing air into said resin stream discharging from said central orifice and defining an atomized convergent spray having a low pressure zone, said fluid tip including a circular shaped member abutting the inner surface of said of said fluid tip and having flats formed thereon to define gaps therein to allow air from said concentric passage to flow through said gaps and mix with the resin to atomize the resin flowing out of said central passage and a dry powdered nozzle having angled flow passages for directing dry powder into the low pressure zone of said atomized convergent spray.
